FOREST DALE ELEMENTARY

Lego Buddies!

By: Valeska J. Simmonds, Site Supervisor

Legos are very popular with children, and they are even more fun when you share them with a friend! One of our kindergarten children wanted to play with Legos and make a car, but he did not know how.

Enter Logan Benjamin, one of our fourth graders. When we asked him if he could help Caleb he said "SURE"! The two of them got to work and before the club ended, they had created two very awesome spaceships! Both of the boys had a great time working together and have built a special relationship with each other. It is fantastic when an older child takes a special interest in helping a younger child learn something new!

Happy February Birthday!

By Valeska J. Simmonds Site Supervisor

January can be a quiet and perhaps a boring month because it comes right after December with all of its hype, fun and gift giving.

Now a birthday in January changes everything! It belongs to them, and we do what we can to make that day memorable from singing Happy Birthday (off-key) to giving them a card and choosing from the prize box. We want them to know that we think they are something special! Happy Birthday to our ESE January Birthdays! You guys are awesome!
