There Are New Faces At Smoky Row's ESE Program!

We at ESE welcome both the familiar and brand new Smoky Row students to our program. This school year our staff has grown, and we have new faces among us as well! At the top of the collage photo, we have Mr. Hernandez and Ms. Hawkins. Mr. Hernandez comes to us from California. He hopes to one day be a teacher and is excited about working with the Smoky Row students. Ms. Hawkins is one of our new high school students that works our program later in the afternoon. She is a high school student at Carmel High School. She is familiar with the program, because she was a kid counselor this past summer at Play On camp.

One the bottom row of the collage, we have Ms. Caryn Grace Horn, Ms. Casey Horn, and Ms. Koehl. They will be substitute kid counselors for our program this year. Ms. Koehl is a college student at Ball State University where she is working on getting a degree in Elementary Education. Ms. Casey Horn is studying Communication Disorders at Indiana State University to become a Speech Language Pathologist. Ms. Caryn Grace is attending college all the way in California! These three awesome ladies will be at Smoky Row during times when they are on school breaks.

NEWS & VIEWS

Building Time at ESE!

The Smoky Row students have been building away since the beginning of the school year. On the left of the photo, there is an image from our magnet frames morning club. The students have been building some amazing things! Pictured is an awesome 3D heart that students worked together as a team to create. They have also made things like a 3-D star, a hospital, and animals that stand. It is a fun time for us in the morning, because students often choose to bring their creativity together to push the limits.

On the right side of the photo there is an image from our afternoon club called Stacking Cup Champs. At this club, students learn how to competitively stack cups through tutorials and guidance from kid counselors. On occasion, students want to wrap the club up by making the biggest towers they can make stacking all the cups up. The picture captures a moment where the students made a triangular shaped tower that was taller than their kid counselor, Mr. Hernandez!
