## Boy Scouts of America brings STEM to ESE!

On October 15, 2019, our ESE program participated in a mobile STEM lab provided by the Boy Scouts of America. The children were able to make their own cup rockets. We had tons of fun watching the kids construct their rocket out of rubber bands and plastic cups.

This was an awesome break from our normal routine.

We do plan on having the Boy Scouts of America come in for more STEM activities to do with our children. We are hoping after speaking on the opportunities these can bring to the children, that they will show an interest in what mobile STEM labs can offer them.

## Lights On Afterschool Costume Party

Orchard Park ESE celebrated our Lights On Afterschool party on October 24, 2019. This is our second year of having a costume party & we were so excited to invite parents this year! The children love that they are able to wear their costumes at ESE. We saw so many wonderful characters.

Aside from their costumes, families were able to enjoy some pizza and drinks before the fun started. We offered Halloween crafts, which the kids loved! We played several games of Halloween bingo where the children were able to win board games. We also had a dance party in the gym and our children were so excited to dance the evening away! We want to thank you all for participating and can't wait to celebrate again next year!
