NEWS & VIEWS

Spooky Fall Festival Success

Thank you for a wonderful Spooky Fall Festival! We had a wonderful time and enjoyed spending the evening with our families. Trick-or-Treating was a blast as the kiddos went around to each Counselor to get some goodies! We even had a Laser Maze and some glowing fun in the LGI! We always love seeing your beautiful, colorful pumpkins each year and hope you enjoyed the caramel apples....even with too much chocolate and too many sprinkles!! Most of all, at the end of the night, our Mummy Races were fantastic this year as we wrapped up our moms and dads! What fun we all had in the mummy wrappings in the gym! We hope you had a spooky great time and we hope to see you back next year!

Homework Time @ ESE

We are so happy to have a more engaged and creative Academic Assistance time at TM ESE. Though we still encourage all of our students to complete their homework here at ESE so they can relax at home, some kiddos need a brain break after being in class all day! What better way to get a break than by using our brains in a fun creative way! We have STEM options each day that our students can choose from along with a homework and reading area. These options are also available for those who are requested to get their homework completed first, after checked by a counselor. We have enjoyed watching them build creative structures, practice spelling and math skills by playing games, and thinking outside the box when problem solving.

A new addition to our Academic Assistance time at ESE is our Virtual Field Trips. This may be exploring the NatGeo or NASA website, watching The Magic School Bus, or seeing a clip from Bill Nye the Science Guy. We are wanting to incorporate fun, new, knowledge-building opportunities for our kiddos after school.
