BINGO Bonanza!

Christian Amaro, Assistant Site Supervisor

On Thursday, October 24th, Woodbrook Extended School Enrichment took part in a Lights On After School celebration. Lights On After School is to bring awareness to after school activities and the importance of keeping the lights on for our students! This year Woodbrook put on our very own bingo celebration! Light refreshments were served and all the table décor was put in place by our very own students! It was great to have nearly all of our students participate in bingo and get really into it! There were a variety of prizes available for those who won, as well as pencil prizes for everyone who attended! There were even some students who won prizes and ended up giving up those prizes to others who were upset from not winning. It was nice to switch up our event from what is typically done and have the students involved throughout the whole event! Our students and staff always look forward to these events and keeping our lights on after school here at Woodbrook!

Bonus Options

Each day at Woodbrook we offer a variety of clubs for our students to partake in, ranging from active sports options to craft and game options! These club activities are very detailed and often differ from week to week. We also offer a bonus option four out of the five weekdays. These bonus options are always less structured options that are available if the students do not wish to participate in the other club options. Some of the activities that are offered include building blocks, board games, stacking cups, and coloring. Bonus options provide students with an opportunity for student creativity as well as free play with

little boundaries. Sometimes these options are an easy go to for students who have had long days and would like to do something with less hassle. These bonus clubs also offer an opportunity for students to build relationships with each other as well as staff members. There was an instance when a group of students were coming together to build a large scale item, the image that came to mind was the Titanic. It was awesome to see their minds working together and figuring out how the blocks would translate to a large ship! But after some time there was a Titanic constructed! It is always awesome to see those minds at work during these moments! We look forward to offer bonus options as a creative outlet!
